PROFILE

I am a motivated developer eager to enter a front-end development role. I am seeking a challenging and stable opportunity to expand my skill set and apply my broad range of skills. I am a hardworking, reliable, and passionate developer, who is dedicated to ongoing learning and growth. I am confident that my skills will enable me to thrive and progress as a front-end developer. The UWA course I completed helped grasp a firm understanding of the fundamentals which has further sharpened since the course. The hobbies I enjoy outside of coding are bouldering, boxing and music.

WORK EXPERIENCE

Event Staff - Supervisor - Current Job

The Event Mill | 1/8 Belmont Ave, Belmont

- Managing a team (3-15 people) to setup events around Perth
- Solve various issues on-site to complete event setups
- Meet deadlines and tight time frames
- Learn many ways to setup items such as stretch tents, marquees and lighting
- Communicating with client and other companies to produce the best outcome for their event
- Effectively managing team to complete the task efficiently

Recipe Blog - Project

- I created this blog to share my love for cooking and to document delicious recipes for fellow food enthusiasts.
- This project is my first venture into the world of Next.js, Google Authentication, and MongoDB. It's been an incredible learning experience.

Up Bank Savers Display - Project

- I used the Up Bank API to create a real-time animated display for one of my savers account. I learnt all about webhooks and was able to work on and reinforce my backend knowledge.
- The stack used was Vite + React, node.js + express.js, Up Bank API and Ngrok.

E-commerce Art Store - Project

- In this project I was apart of building an ecommerce website for local artists. I was assigned with backend tasks which was creating RESTful APIs and creating and handling the functionality of LOGIN and LOGOUT.
- This was a fun challenging project which helped me understand Node.js, Express.js, MySQL and Sequelize.

Note Taker - Project

- A classic Note taking application that lets you create, read and delete notes.
- To build this application I used HTML, CSS, JS, NODE.JS and Express.js.
